1. EXECUTIVE SUMMARY

DETENTIONS TOTALS	2012	2013	
Cases	90.473	86.854	
Articles	39.917.445	35.940.294	
Domestic retail value	€ 896.891.786	€ 768.227.929	

Countries of provenance.

China remains the main country of provenance from where goods suspected of infringing an IPR were sent to the EU. In terms of product category, other countries appear as country of provenance, notably Egypt for foodstuffs, Turkey for perfumes and cosmetics and Hong Kong, China for other body care items, mobile phones, memory cards and sticks, ink cartridges and electrical household appliances.

Product categories.

The top categories of detained articles were clothing which accounted for 12% of the overall amount, followed by other goods (11%), medicines (10%), cigarettes (9%), packaging materials (9%) and toys (8%). In 2013, 5 out of 6 product categories remained the same as in 2012.

Small consignments.

The cases related to postal and courier traffic accounted for 72% of all detentions and principally concerned sport shoes, personal accessories like bags and wallets, clothing, sunglasses and watches. In terms of number of articles detained in postal traffic, medicines remained for the fourth consecutive year the top category with 19%.

Health and safety concerns.

Products for daily use and products that would be potentially dangerous to the health and safety of consumers (i.e. suspected trademark infringements concerning food and beverages, body care articles, medicines, electrical household goods and toys) accounted for a total of 25,2% (compared to 12,7% in 2012) of the total amount of detained articles mainly due to the increase in the number of medicines detained.

Destruction of goods.

In 92% of the cases of detentions by customs, the goods were either destroyed after the owner of the goods and the right-holder agreed on destruction, or the right-holder initiated a court case to establish the IPR infringement. In 8% of the cases, goods were released because the right-holder did not react to the notification by customs (4,9%) or they were original goods (2,9%).

In number of articles, 81% of the articles were destroyed or were subject to proceedings. However, 18,3% of the articles were released because they were original goods (9,8%) or the right-holder did not react to the notification by customs (8,5%).

2. Introduction

The annual publication of the result of customs actions at the EU external borders provides an opportunity to measure the scale of customs actions to enforce IPR. The enforcement of IPR by customs is a priority for the Commission and the Member States.

Innovation and creativity are the engines of our economy. It is important to provide right-owners with the certainty that the fruits of their inventions will be protected. The competitiveness of European businesses depends on it.

Customs administrations in the Union have been known for years for their high standard of enforcement of IPR. In 2013, customs authorities opened almost 87.000 detention cases for a total of nearly 36 million articles. The domestic retail value of the detained articles represented 768 million Euros.

This report contains statistical information about the detentions made under customs procedures and includes data on the description, quantities and value of the goods, their provenance, the means of transport and the type of intellectual property right that may have been infringed.

The statistics are established by the European Commission, based on the data transmitted by the EU Member States administrations, in accordance with the EU's relevant customs legislation. Until December 2013, Council Regulation (EC) No 1383/2003¹ laid down the provisions for customs actions to enforce intellectual property rights and the implementing legislation, Commission Regulation No 1891/2004², provided specifically for the submission by Member States of information on the detentions made³.

The present annual statistics provide useful information to support the analysis of IPR infringements in the EU and the development of appropriate counter-measures by customs. Such figures allow for a better understanding of the scope and extent of the problem, which has become a global phenomenon.

_

¹ OJ L 196, 2.8.2003, p. 7.

² OJ L 328, 30.10.2004, p. 16.

On 1 January 2014, Regulation (EU) No 608/2013 (OJ L 181, 29.6.2013, p.15.) became applicable and will provide the basis for next year's annual report.

3. COOPERATION BETWEEN CUSTOMS AND RIGHT-HOLDERS

Right-holders may lodge an application for action requesting customs to take action in cases where a suspicion exists that an IPR is infringed. Applications for action can be requested on a national or on a Union basis, every year. For risk assessment to function properly in the field of IPR protection, the importance of close cooperation between customs and right-holders and of the information given by right-holders in their applications for action is recognised. The Commission, in collaboration with the Member States, has established a manual for right-holders for lodging and processing applications for action (see also DG TAXUD's website under right-holders defence section at

http://ec.europa.eu/taxation_customs/customs/customs controls/counterfeit_piracy/right_holders/index_en.htm).

In the last decade the number of applications for action made in the Member States has constantly increased, from 10.260 in 2007 to 26.865 in 2013.

Year	Applications
2007	10.260
2008	12.866
2009	14.797
2010	18.330
2011	20.566
2012	23.134
2013	26.865

Chart 1 - Number of applications 2007 - 2013

EU customs also have the power to act ex-officio if there is a suspicion of an IPR infringement. In such cases, customs have to identify the right-holder and an application must be submitted within 3 working days in order for customs to be able to continue the detention or suspension of the release of the goods. As in line with previous years, the majority of customs actions were initiated with prior application by the right-holders.

Chart 2 – Breakdown of cases by type of intervention

4. IPR DETENTIONS IN NUMBER OF CASES AND ARTICLES

The total number of cases (each case representing an interception by customs) remained almost equal in 2013 compared to the previous years, with a small decrease of 4%.

Each case covers a certain amount of individual articles that can vary from 1 to several millions and can cover different categories.

Year	Number of cases
2007	43.671
2008	49.381
2009	43.572
2010	79.112
2011	91.254
2012	90.473
2013	86.854

Chart 3 - Number of registered cases

The constantly high number of cases can be explained by the high number of cases in postal and courier traffic resulting from internet sales.

In relation to the categories involved, there have been no major changes in the type of products detained compared to last year. See also annex 3.

The total amount of articles detained also remained stable compared to the previous year, with almost 36 million articles in 2013.

Year	Number of articles
2007	79.076.458
2008	178.908.278
2009	117.959.298
2010	103.306.928
2011	114.772.812
2012	39.917.445
2013	35.940.294

Chart 4 - Number of articles

In annex 4 an overview of the years 2010 to 2013 is given per category of goods.

Significant decreases (>50% compared to 2012) have been taking place in the categories: ink cartridges and toners, sporting articles, cigarettes and other tobacco products, machines and tools, lighters, labels, tags and stickers and textiles.

The most important increases (>50% compared to 2012) took place for the categories foodstuffs, alcoholic beverages, jewellery and other accessories, mobile phones, CD/DVDs, toys and games, medicines, car parts and accessories and office stationery.

The top 10 Member States accounted for 91% of the overall amount of cases and for 80% of the overall amount of articles. Seven Member States appear in the top 10 of both cases and articles. See Annex 1 for more details per Member State.

Chart 5 - Overview Member States in percentage of cases and articles

5. RESULTS OF DETENTIONS

The following results following the detentions were registered:

- goods were destroyed under the simplified procedure after confirmation of the right-holder and agreement of the holder of the goods;
- a court case was initiated by the right-holder to determine the infringement;
- goods were released as they appeared to be non-infringing original goods;
- the outcome was pending as goods are still under the period of detention at the moment of reporting;
- goods were released because the right-holder did not react to the notification by customs;
- a settlement was reached between the right-holder and the holder of the goods after which the goods were released;

Chart 6 - Breakdown of result by cases

Goods that appeared to be non-infringing original goods or for which the right-holder did not take action were released from detention on the basis of Regulation (EC) No. 1383/2003. However, this does not exclude the possibility that these goods could have been subsequently detained on the basis of another legislation.

In 92% of the detentions, the goods were either destroyed under the simplified procedure or a court case was initiated to determine the infringement. In 8% of the cases, the goods were released because they appeared to be non-infringing original goods or no action was undertaken by the right-holder after receiving the notification by the customs authorities.

In absolute numbers this gives the following results:

Chart 7 - Result of detention in absolute numbers

6. PRODUCT CATEGORIES

In terms of numbers of detained articles, the top 3 categories are clothing, other goods (e.g. insecticides, shoe polish, lights bulbs, glue, batteries, air refreshers, washing powder) and medicines being products often shipped in larger quantities.

Chart 8 - Top categories by articles

Chart 9 - Top categories by cases

In terms of cases, the top 3 categories are sport shoes, clothing and bags, wallets and purses. The top 6 are also the kind of consumer goods often shipped via post and courier after an order via the internet (See also annex 11).

Value

The standard value for reporting by Member States is the domestic retail value (DRV) which is the price at which the goods would have been sold at retail on the Member State market had they been genuine.

This being said, IPR infringing goods are increasingly sold at a price similar to that of the original goods and effectively substitute them on the market, except for luxury goods.

For procedural reasons, the same method of valuation is used for all product sectors. Therefore, the data reflected within this section provides a broad figure of values, calculated on the basis of customs detentions. The figures do not measure the impact on the EU's economy, nor the damage caused to right-holders by the trade in IPR infringing goods.

Chart 10 - Top categories by value

Based upon the domestic retail value the top categories, luxury goods such as watches, sunglasses and clothing appear in the top 3. (See Annex 2 for a complete overview of all categories).

7. PROVENANCE

China remains the country where most of the suspected IPR infringing goods were coming from at the moment of the detention, and which were not released. As in former years Hong Kong, China, Greece, Turkey and the United Arab Emirates appear in the top 10 although in a different order. Ghana newly appears this year due to detentions of large shipments of batteries.

Chart 11 - Country of provenance by articles

With regard to the countries of provenance in relation to value, there is no change in the top 3 compared to 2011 and 2012.

Chart 12 - Country of provenance by value

A further breakdown according to categories is given in Annex 5.

8. Freight/Passenger traffic

Cases involving passenger traffic relate to goods brought into the EU by passengers in amounts considered to be of a commercial nature, rather than for private use. The ratio between the number of cases of goods suspected of infringing an IP right found in freight and in passenger traffic is about 97% to 3%.

In Annex 8 an overview is given of the main categories of products carried by passengers. Furthermore, overviews of the countries of provenance of the passengers are given in relation to articles, cases and value.

Chart 13 - Breakdown of cases by type of traffic Freight / Passenger

9. TRANSPORT

As in the past years postal, air and express transport remain the most important means of transport in number of cases detained, whereas sea transport of containers is the main transport modality in number of articles. A further breakdown can be found in Annexes 9 and 10.

Chart 14 - Registered cases by means of transport

Chart 15 - Detained articles by means of transport

10. INTELLECTUAL PROPERTY RIGHTS

As in previous years, the majority of articles detained by customs in 2013 were suspected of infringing a Community or national trademark and covered all product sectors.

For design and model rights also a wide variety of products were concerned with an emphasis on toys, shoes, medicines and other body care items.

With regard to copyright infringements, the product categories most concerned were packaging materials, CD/DVDs, clothing and labels, tags and stickers.

With regard to suspicion of patent infringements, the main categories of products concerned were CD/DVDs, medicines, other body care items and audio/video apparatus.

With regard to suspicion of plant variety right infringements the involved products belong all to the category foodstuff, such as table grapes and strawberries. It is also in this sector that most of the cases are solved by a settlement between the parties involved. Geographical indications were related to alcohol beverages.

Chart 16 - IP rights in percentage of articles

Chart 17 - IP rights in percentage of value

11. CUSTOMS PROCEDURE

In over 92% of all cases, customs action was started whilst the goods concerned were under an import procedure. In almost 5% of the cases, goods were discovered whilst being in transit with a destination in the Union and in 1% of the cases goods were under re-export procedure with a destination outside the EU.

Chart 18 - Breakdown of cases by procedure
